Table S3 AUC values of the five partitions and three models included in the ensemble non-native cattail habitat suitability model

Partition #	AUC VALUES		
	Maxent	Random Forest	Support Vector
1	0.846	.867	.846
2	0.848	.871	.848
3	0.846	.871	.848
4	0.842	.866	.839
5	0.847	.871	.843
Mean AUC	0.846	.869	.844
Mean σ	0.002	0.002	.004
Mean σ^2	0.001	0.001	.001
